IMBB

Proteomics Mini Symposium

Wednesday, 7 October 2009 @ 14.45
Main Amphitheater, FORTH

Dear all,

The Proteomics Facility at IMBB (ProFI; <http://profi.imbb.forth.gr/>) was established a few months ago through an EU infrastructure grant. ProFI is equipped with a state of the art mass spectrometer and has been generating experimental data since June. Optimal integration of all the modules necessary for the various proteomics flows will require continuous effort. Nevertheless, we want to celebrate that ProFI is up and running! To this end we are organizing a mini proteomics symposium with lectures given by three leading proteomics experts.

You are all welcome to attend.

Tassos Economou

14.45 - 15.00 **Tassos Economou**

Institute of Molecular Biology and Biotechnology, FORTH, Heraklion

“ProFI to IMBB: Hello”

15.00 - 15.30 **Bruno Domon**

ETH, Institute of Molecular Systems Biology, Zürich

“Quantitative Strategies: Towards Comprehensive Proteome Analysis”

15.35 - 16.05 **Albert Sickman**

Rudolf-Virchow-Center, DFG Research Center for Experimental Biomedicine, University of Würzburg

“Functional Proteomics of Human Platelets and Yeast Mitochondria”

16.05 - 16.30 *Coffee Break*

16.30 - 17.05 **Juri Rappsilber**

Wellcome Trust Centre for Cell Biology, University of Edinburgh

“The Protein Composition of Mitotic Chromosomes by Multidimensional Quantitative Proteomics”
